

Sample Successful Deployments of SOA

TIBCO has a track record of helping customers successfully leverage SOA to solve real business problems. The following are some of their success stories.

DBS Achieves Newfound Agility with SOA

DBS is one of the largest financial services groups in Asia. As DBS started to grow, it saw the need to build a technology platform that promotes business agility. Instead of fixing the problem in piecemeal fashion DBS decided to rebuild its technology foundation using an SOA.

Lufthansa Migrates to Flexible IT Infrastructure

Lufthansa Cargo AG (LCAG) is the freight subsidiary of Deutsche Lufthansa AG, the German national airline. In order to optimize process, the company needed to have an infrastructure that dovetails processes with IT management. A project was thus launched to replace its existing multi-functional system with an IT infrastructure that is more flexible and will improve the data consistency, security, and documentation of its software applications. The new infrastructure will take on a service-oriented approach.

Harvard Pilgrim goes Real-Time with Web Services

Harvard Pilgrim Health Care, the oldest nonprofit health plan in New England, sought to improve its IT infrastructure in an ongoing effort to provide high-quality services. The infrastructure adopted an SOA approach via Web services - essentially a more efficient method of enabling employees to share information seamlessly, and optimizing the data flow between Harvard Pilgrim and its provider network.

QUALCOMM Improves Message Delivery, Integration Through Real-Time Enterprise Architecture

QUALCOMM produces innovative communications and wireless technologies that are transforming the way many industries work. Using TIBCO software, they have implemented an IT architecture that supports events and services to reduce the cost of integrating their existing assets and improve the collection of revenues from the constantly varying usage of wireless services.
